MILESTONE FOR GRANULES INDIA

USFDA nod for Abbreviated New Drug Application

Hyderabad: Granules India Ltd has received US Food and Drug Administration approval for its Abbreviated New Drug Application for Ibuprofen tablets (400, 600 and 800 mg).

Stating that the USFDA has given its final approval, chairman and managing director

C. Krishna Prasad said the development would further strengthen the company's base business. It would enable the company to increase the product offering to the customers in the US, he said in a release on Wednesday.
