Opinion Statement

We have conducted a limited assurance engagement on the sustainability information described in **Granules Sustainability Report 23-24 for the reporting period 1st April 2023 to 31st March 2024**.

Based on the procedures we have performed and the evidence we have obtained, nothing has come to our attention that causes us to believe that the accompanying Sustainability Information is not prepared, in all material respects, with reference reporting to GRI Standards 2021.

Methodology

Our assurance engagements were carried out in accordance with ISAE3000 (Revised). Our work was designed to gather evidence on which to base our conclusion. We undertook the following activities:

- a top-level review of issues raised by external parties that could be relevant to Granule's policies to provide a check on the appropriateness of statements made in the report.
- discussion with managers and staffs on Granule's approach to stakeholder engagement. However, we had no direct contact with external stakeholders.
- interviews with staffs involved in sustainability management, report preparation and provision of report information were carried out.
- document review of relevant systems, policies, and procedures where available
- review of supporting evidence for claims made in the reports.
- review of key organizational developments
